We are delighted that you have chosen Whispering Meadows Ranch for equine-assisted activities! We strive to be a place where visitors and their families feel welcomed and accepted unconditionally. The Ranch's foundational principles are Christ-centered and we are guided by and fully embrace Christian values including respect, kindness and compassion.

## **Mission Statement**

Our mission is to enrich the lives of those with disabilities and special needs through equine-assisted, recreational and educational programs for Flagler and surrounding counties.

## **Therapeutic Riding Program Information**

Equine assisted programs have been recognized as an effective method of therapy, especially when tailored to enhance a rider's specific needs. Goals include building strength, balance, sensory integration and spatial awareness. Therapeutic riding is supervised, dynamic, safe and enjoyable for children and adults with a variety of physical, mental and emotional disabilities. Specific lessons are designed to meet the needs of the individual rider in order to enhance physical, emotional and cognitive development.

## **Hippo-therapy**

Hippo-therapy is performed by an Occupational Therapist (OT), Physical Therapist (PT) or Speech and Language Pathologist (SLP) is a medical therapy provided under a physician's prescription and is a strategy that utilizes the horse's natural and multidimensional movements. This approach is used as part of an integrated treatment program, with the ultimate goal of achieving measurable and functional outcomes. It is different than regular horseback riding and does not teach those traditional skills. The gait of the horse is unique because it is similar to that of the human and can thus facilitate corresponding movement patterns in the human pelvis. The horse's walk provides valuable sensory stimulus that is rhythmic, variable, and repetitive. This dynamic movement, when coupled with the traditional PT, OT or SLP techniques, works to improve functional outcomes, both physically and emotionally. This type of therapy generates muscle tone, strength, coordination, balance response, postural function and sensorimotor capacity, while providing the warmth, grace and healing effect of horses and ponies. This therapy is instructed by a licensed OT, PT, or SLP certified PATH Therapist and assisted by a certified PATH instructor.

The Ranch was founded in 2008 by Helene & Richard Davis and their daughter, Kristine Aguirre. Whispering Meadows Ranch is a PATH Int'l (Professional Association Therapeutic Horsemanship) Member Center with certified instructors on site to teach all equine-assisted programs. The Ranch family of community members and volunteers are committed to providing an environment of compassion and understanding while utilizing the therapeutic effect of horses in all aspects of the program.

## **Whispering Meadows Ranch Horses and Ponies**

WMR owns the horses and ponies used by the program. All have been selected for their quiet temperaments and have been trained to be comfortable working in the mounting area, around wheelchairs and other assistive devices, as well as with leaders and side-walkers. The horses and ponies used in WMR classes are wonderful animals and they deserve the utmost respect for their tolerance of tight leg muscles, bouncing riders, and hands which may pull too hard or too often.

However, no matter how calm the horses may seem, they may occasionally spook at sudden noises or movement, or for reasons unknown. For this reason, it is imperative to follow all barn and safety rules.

## **Barn Safety Rules**
